STUDIO DEZAHRA

Collection

Our Tunisian stone collection represents some of the best quality natural stone products in the world. Our limestone and marble have historically been reserved for only the most lavish Roman villas and Cathedrals. Even today, these stones are limited in their availability. The benefit of our stones, in addition, to their exclusivity, is their technical properties. Most of our limestone selections are characterized by having very high density and low porosity.

We use our Tunisian stone collection for our stone sinks, fireplaces, fountains, columns, mosaics, marble inlay (cosmati) medallions, and architectural elements. In addition, our proprietary sealing process allows our limestone to be used as countertop materials as well as sinks and shower pans.
